

EXOSOME HAIR RESTORATION

THE SCIENCE OF CELLULAR
ILLUMINATION[™]

ReGenesis Follicle System™

PROFESSIONAL CLINICAL PROTOCOL EXOSOME HAIR REGENERATION TREATMENT

STEP 1 – PREPARATION

Clean scalp with antiseptic or sterile saline,
Optionally apply numbing cream if using micro-needling
or RF-assisted devices.

STEP 2 – APPLICATION

Draw 1-2 ml of ReGenesis Follicle System Serum per treatment
area, Apply via microchanneling, RF microneedling,
SH-polypeptide-9, Copper tripeptide-1.

STEP 3 – POST-CARE

Avoid washing hair 12-24 hours post-treatment
Recommend ReGenesis Home Renewal Spray for support

FORMULA HIGHLIGHTS

- 20 Billion Synthetic Exosomes (for cellular signaling)
- 2% PDRN (20 mg (nl) + HMW Hyaluronic Acid
- 8 Biomimetic Peptides
- SH-oligopeptide-1
- SH-polypeptide-9
- Acetyl decapeptide-3
- Copper tripeptide-1

KEY BENEFITS

- Stimulates follicle regeneration and density
- Repairs scalp microenvironment improves circulation
- Strengthen hair shaft reduces breakage
- Thickens and revitalizes dormant hair

RADIANT EXOSIGNAL HAIR

Represents the future of hair restoration
with synthetic exosomal technology.

20 billion exosomes enriched with 2% or 20 mg/ml
Polyribonucleotides (PDRNs), AND HMW HA

BIOMIMETIC PEPTIDE

- SH-oligopeptide-1
- SH-oligopeptide-2
- SH-polypeptide-1
- SH-polypeptide-1
- Copper tripeptide-3

GREEN APPLE STEM CELLS AND VITAMINS,
COSMETIC EFFECT that thickens hair
with repairing effect on damage;

- Panthenol
- Malus domestica
- Glutathione
- Pyridoxine
- Pyridoxine HCl
- Thiamine HCl
- Glycerin
- Biotin

Applications: Can be
incorporated with any microchanneling
treatment (e.g., Microneedling, RF Microneedling,
TED, Jet Peel and similar).
