

ALL IN ONE WEIGHTLOSS SOLUTION FOR YOUR CLINIC
Presented by Radiant Laser

- Cryolipolysis / Fat Freezing (Khrysis handles)
- Stubborn fat pocket reduction
- Localized inch-loss contouring
- Body sculpting / silhouette reshaping
- Radiofrequency (RF) Skin Tightening
- RF body firming / lifting
- Collagen & elastin stimulation for body skin
- Crepey-skin improvement
- Post-weight-loss skin tightening
- Cellulite smoothing (RF-assisted)
- Ultrasound Cavitation / Ultrasound Slimming
- Fat emulsification / breakdown
- Waist slimming / waist snatching
- Contour refinement after fat freezing
- Texture smoothing using ultrasound + drainage
- Lipo Laser Body Slimming (multiple laser handles)
- Full-body lipo-laser slimming protocols
- Spot-reduction lipo-laser treatments
- Circumference reduction / inch-loss sessions
- Lymphatic-support slimming protocols (laser-assisted mobilization)
- Combination Body Contouring Protocols
- Fat freezing + RF tightening contour plans
- Ultrasound + RF "smooth & tighten" plans
- Lipo-laser + ultrasound accelerated slimming
- Multi-modality advanced sculpting programs

RADIANT LASER

Radiant ReGenesis by Radiant Laser

Elite Body Contouring Platform

The next generation of non-invasive sculpting, slimming, and skin refinement

Meet the Radiant ReGenesis—our most advanced Elite Body Contouring platform, designed for full-spectrum transformation: fat freezing, ultrasound slimming, radiofrequency tightening, and multi-handle lipo-laser protocols. This all-in-one system blends the newest body-shaping technologies into a single, high-performance experience, delivering dramatic contouring with comfort, safety, and precision.

Whether clients are looking to reduce stubborn fat, refine body lines, smooth texture, or tighten lax skin, ReGenesis offers customizable, luxury-grade results with a clinical backbone.

What Does This Platform Treats?

The ReGenesis is built to support complete body sculpting goals, including:

- Stubborn fat pockets resistant to diet and exercise
- Overall inch-loss and body slimming
- Cellulite and uneven texture
- Skin laxity / crepey skin after weight loss or aging
- Body contour refinement (waist, abdomen, thighs, arms, flanks, back, bra line, glutes, under-chin)

Every treatment is designed to be non-surgical and non-invasive, with zero downtime and visible progression over a series of sessions.

Elite Multi-Technology System

ReGenesis combines powerful modalities that work in synergy:

1. Fat Freezing with Khrysis Cryo Handles

Our precision Khrysis fat-freezing handpieces target stubborn adipose tissue using advanced cooling technology. Fat cells are crystallized and naturally eliminated through the lymphatic system over time—resulting in a smoother, slimmer silhouette.

Ideal for: abdomen, flanks, inner/outer thighs, upper arms, bra line, back, under-butt area.

RADIANT

LASER

2. Newest Radiofrequency Body Firming

Our newest generation RF body tightening delivers focused thermal energy to stimulate collagen and elastin. This improves tissue density, firmness, and tone while encouraging smoother skin quality.

Benefits include:

- Instant tightening effect
- Progressive lifting over 4–8 weeks
- Smoother texture and reduced crepiness
- Enhanced contour definition

3. Elite Ultrasound Body Slimming Technology

High-performance ultrasound slimming handpieces create mechanical micro-vibrations that break down fat clusters and support metabolic drainage—perfect for sculpting areas that need refinement and definition.

Great for: waist snatching, lower abdomen, saddlebags, thighs, arms, and contour finishing after fat freezing.

4. Lipo-Laser Supreme Slimming Protocols (Multiple Handles)

ReGenesis includes multiple Lipo Laser handles for full-body resurfacing and accelerated inch loss. Laser energy penetrates fat layers to liquefy and mobilize stored lipids for natural elimination—supporting both spot reduction and global slimming.

Perfect for: full torso slimming, legs, arms, and layered protocols with RF/ultrasound.

Why Do Our Clients Love ReGenesis?

Clients choose this platform because it feels luxurious, works fast, and delivers a true body-reimagination over time.

Key advantages:

- Multi-handle, full-body efficiency
- Comfort-focused treatments with no needles or surgery
- Custom protocols for every body type
- Visible inch loss + skin tightening in one plan
- Enhanced results when modalities are combined
- No downtime — clients return to normal life immediately

ReGenesis isn't just a machine—it's a complete sculpting ecosystem.

Each treatment plan is designed by our highly trained clinical aesthetics team and may include:

- Clinical body mapping & customized goal setting
- Layered modalities for maximum fat reduction + tightening
- Post-treatment lymphatic support recommendations
- Progressive before-and-after tracking
- Optional pairing with wellness or skin-rejuvenation services

Recommended Treatment Series

Most clients see best results through a structured series:

- Fat Freezing: typically 1–3 sessions per area
- Ultrasound + RF tightening: 6–10 sessions depending on goals
- Lipo Laser protocols: 6–12 sessions for global sculpting
- Combination plans often produce the fastest, most dramatic outcomes

Your provider will design a sequence tailored to your body, lifestyle, and desired transformation timeline.

Safe, Non-Invasive, Clinically Guided

ReGenesis treatments are non-surgical, low-risk, and widely tolerated, performed by trained professionals in a controlled clinical environment. We prioritize:

- Safety screening & contraindication review
- Comfort and body-positive care
- Ethical, realistic outcome planning
- Long-term skin health and contour integrity

Your Body, Reimagined

If you're ready to slim, sculpt, and tighten—without surgery—the Radiant ReGenesis Elite Platform is your pathway to a more refined, confident silhouette.
