

RADIANT
LASER

Radiant Laser Technology

Company story, operations, training support and device lineup

Prepared for Radiant Technology Corp.

Source links included throughout and on final page

What We Are Building

This brochure is a multi-page sales and brand overview for Radiant Laser. It uses the attached photos plus Radiant website/product links to tell the company story, show the operations and training environment, then present each device with key talking points and direct links.

1

Company Story

Who Radiant is, its global footprint and support-first positioning.

2

Operations

Calgary Head Office, Winnipeg, Regina, Ontario and BC regional coverage.

3

Training & Support

Photos of live training, boardroom sessions, team support and clinic education.

4

Device Lineup

Device pages with clickable product and spec-sheet links.

Note: Locations are presented by city name only as requested, without full street addresses.

Who We Are

Source: Radiant About Us

RADIANT
LASER

Radiant Technology Corp.

Radiant Technology Corp. was founded by an international business group with deep experience in engineering and instrumentation technology.

The company positions itself around Health Canada-approved laser systems, professional training, affordability and support for beauty and medical-aesthetic businesses.

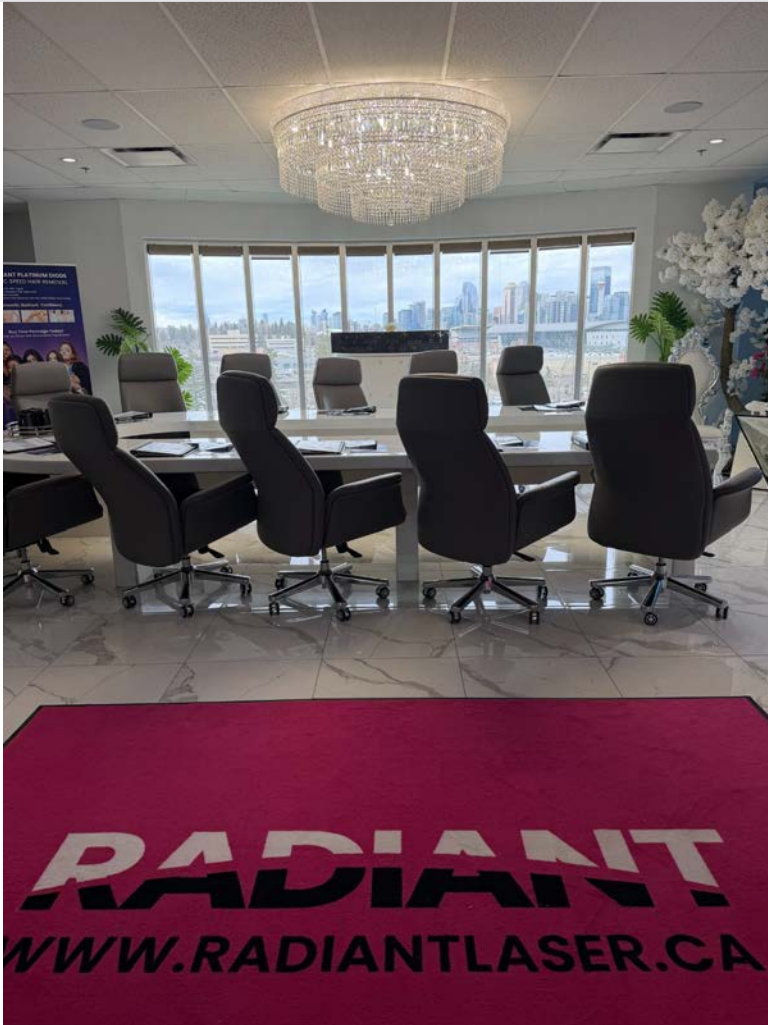

Its operating footprint includes Canada, the USA and Asia, with the goal of giving clinics access to advanced, cost-effective technology and ongoing support.

POSITIONING

- High-performance cosmetic laser innovation.
- Training and support for clinic teams.
- Scalable devices for medspas and beauty professionals.

About Us

Operations & Service Network

Requested operations view

Calgary Head Office

Winnipeg

Regina

Ontario

BC

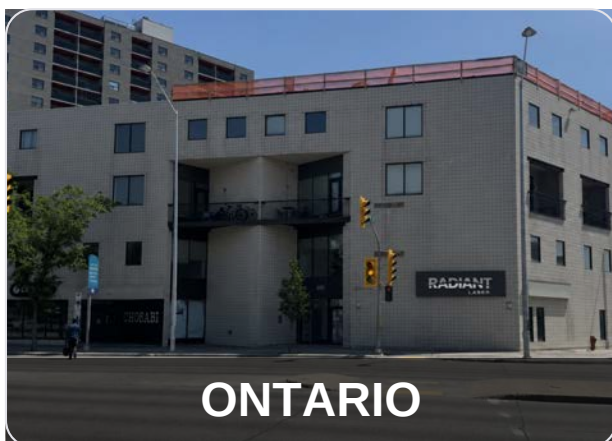

This page keeps the operations section simple: city names, service coverage and support network only.

LOCATIONS

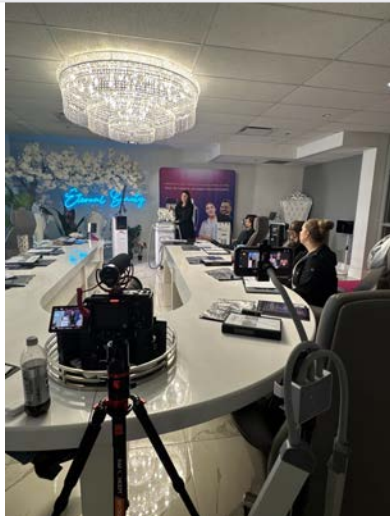

Regional offices, warehouses and support locations shown by market name only.

CALGARY HEAD OFFICE | WINNIPEG | REGINA | ONTARIO | BC

Training & Support

Hands-on demos, support sessions, training gallery assets and in-room education.

What this section communicates

- Radiant does more than sell machines: it supports training, demos and operational confidence.
- The Calgary boardroom and training photos show real learning environments, not generic stock imagery.
- Training and support can be a core trust-builder for new clinic owners and medspa teams.
